Precision	0.1g (0.5–99.9g) / 1g (100–500g)
Unit	g (gram)
Input	5V / 1.0A
Power	Li-ion (3.7V DC) / 200mAh
Parameters	(63 × 63 × 98) mm

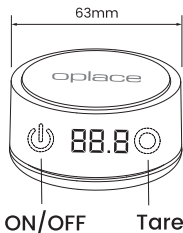

※ Max charging current: 1.0A

Dosing Cup

※ Suitable for 54/58mm Portafilter Basket.

Coffee Scale

※ Maximum Weighing Capacity is 500g.

How to Use

※ **First, do this**

Place the scale on a flat, stable surface .
This ensures accurate readings.

1. Basic Weighing (for small items)

- Press the “⏻” button. The display will show “0.0”.
- Place your item directly on the scale.
- Wait 1–2 seconds for the number to stabilize, then read the weight.

※ **Tip:** If the number jumps, check that the scale is **level** and isn't moving.

2. Coffee Dosing (with the included cup)

- Turn on the scale and place the Dosing cup on the surface.
- Press the “⊙” button to zero the scale. (display shows “0.0”)
- Grind coffee directly into the cup. (or pour pre-ground coffee in)
- Stop when the display shows your target dose (e.g., 18g for pour-over).
- Press and hold “⏻” for 2 seconds to shut down the device.

※ **Tip:** The dosing cup fits most home coffee grinders, so you can waste **less** coffee.

3. Advanced Tare (for multiple batches)

Use this if you need to weigh multiple ingredients or batches in a row:

- Place your first empty container on the scale and press **Tare** to reset to “0.0”.
- Add your first item and note the weight.
- Remove the container and item, then place a new empty container on scale.
- Press **Tare** again to reset, and repeat for your next batch.

※ **Tip:** The Tare function works for any container up to 500g — no need to remove the scale between uses.

4. Set Auto-Off Time (Step-by-Step)

- **Enter setup mode:** Press and hold “⏻” + “⊙” together for 2 seconds. The display will show your current auto-off time. (e.g., “180” for 180 seconds)
- **Choose your time:** Press “⊙” to cycle through options: 0 → 30 → 60 . . . 270 → 300 (0 = no auto-off).
- **Confirm:** Press Tare to save your choice. The scale will return to weighing mode.

※ **Tip:** Set to “0” if you’re doing a long coffee brew (e.g., cold brew) and don’t want the scale to turn off mid-process.

Care & Safety

※ **Cleaning:**

- Wipe the scale with a dry or slightly damp cloth.

※ **Safety:**

- Don't drop the scale (it's delicate!).
- Keep away from water, heat, or fire.
- Don't weigh items heavier than 500g (it may break the scale).

WARNING:

Measuring cup bottom not fully sealed.

Do not use directly as a liquid container or to catch coffee extract.
